

MODERN DESIGN LINEAR DRAINS

LUXE Linear Drain Installation Cross Section

NOTE:

- Any approved waterproofing material may be used: CPE/vinyl membrane, metal pan, paint/roll-on, hot mop or surface membranes.
- Floor drain (provided by others) may be constructed of ABS, PVC, cast steel or other materials.
- Uncoupled connection between the linear drain outlet and drain body provides a weep gap to allow moisture to come through the tile bed to a path down and out of the drain body — increasing the quality and longevity of the installation.

*** Ensure compliance with all local codes and requirements ***
